## To produce solutions of the future world from today. Kösedag...

Kösedag, started production activities with the title of mesh, wire and fence in Turkey in 1978. Since its foundation, it enjoys the rightful pride of being the founder and pioneer of this sector in Turkey.

Kösedag has always maintained a sustainable growth and has created a dynamic working model, innovative solutions, a wide range of products and pioneering technologies integrated into its production track and sets trends.

## A Rooted Experience Since 1978...

As a result of this vision, it owns many patents and unique industrial designs developed to create new values and carries the created values to the world market.

With the world's most advanced machinery technologies added to its facilities, Kösedag develops project based special solutions suitable for all kinds of security needs.

Acting simultaneously with the world to meet the increasing security needs, Kösedag manufactures user and environmentally friendly products by adhering to its indispensable values.

From raw material quality to the production process, from the assembly stage of the projects to the technical support and repair process, Kösedag works meticulously by prioritizing customer satisfaction.

Kösedag is proud of being a Turkish company that represents its country on international platforms with the high security projects it has realized around the world.

With its increasing production quality, it takes part in projects of strategic importance on many different platforms such as high security projects, borders, transportation projects, industrial facilities, housing projects, commercial areas, sports facilities.

## Advisable Post and Fixation Systems

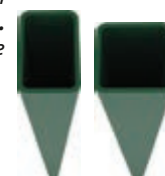

### MULTI-fix K-DAG® STEEL POST

The Multi-Fix K-DAG steel post (70x60 mm) offers 3-way fixation; self locking from front side, clips from side and metal clips with bolts from back side. Slots are at every 50mm and each post is covered with a plastic cap. The Multi-Fix post is designed as an economic solution

### PROFILE POST

Profile post is used as a standard all over the world in different sections. The most common sizes are 40x60mm, 50x50mm, 60x60mm. The panels are fixed on the front side of the posts by the metal clips and bolts.

# DOUBLE PANEL

The Double Panels are an alternative to balustrade with its rigidity because of having twin wires at each horizontal line instead of single at standard panels.

## Advisable Post and Fixation Systems

### MULTI-Fix K-DAG® STEEL POST

The Multi-Fix K-DAG steel post (**70x60 mm**) offers 3-way fixation, self locking from front side, clips from side and metal clips with bolts from back side. Slots are at every 50mm and each post is covered with a plastic cap. The Multi-Fix post is designed as an economic solution  
\*Tensioning System is not possible due to the panel features.

Self Locking

Compress with Clips

Clips with Screw

### EASY-Fix K-DAG® STEEL POST

Easy-Fix K-DAG Steel Post (**90x90mm**) has been designed to perform maximum strength with minimum material to keep it economically. The panels are fixed to post without accessories such as screws, bolts, clips or clamps. As a result, it avoids damage on materials during fastening. Slots are at every 100 mm and each post is covered with a plastic cap.

Self Locking

### PROFILE POST

Profile post is used as a standard all over the world in different sections. The most common sizes are **40x60mm, 50x50mm, 60x60mm**. The panels are fixed on the front side of the posts by the metal clips and bolts.

With Clips

Cover Plate

### KAHLBERG ALUMINUM POST®

Kahlberg post (**90x115 mm**) is the world's only fence post specially designed for double (twin) panels. The panels are being hung from the hooks at the rear. Therefore, impenetrable from the front. The hooks move inside the vertical channel up & down which gives great benefit at installation at sloppy areas.

# DECORATIVE PANEL

The Decorative Panel is KOSEDAG's special design fence with rigid "W" fold in 2 types: Flat and Convex & Concave. Based on different heights special production is available.

### PROFILE POST

Profile post is used as a standard all over the world in different sections. The most common sizes are 40x60mm, 50x50mm, 60x60mm. The panels are fixed on the front side of the posts by the metal clips and bolts.

With Clips

# RAZOR PANEL

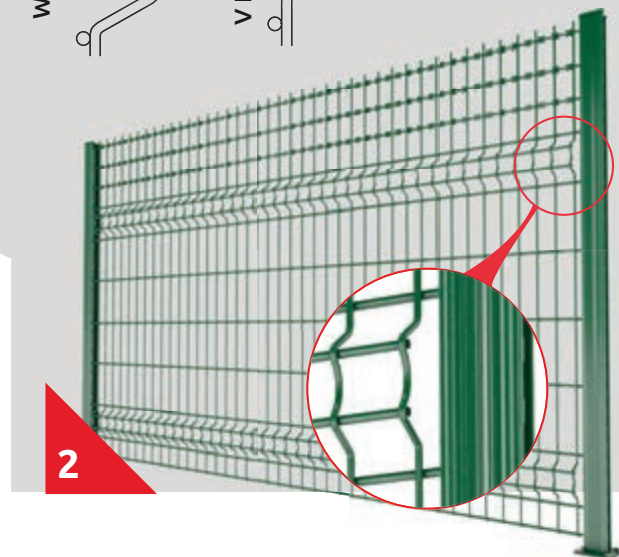

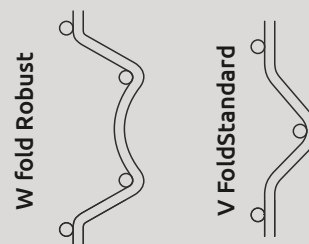

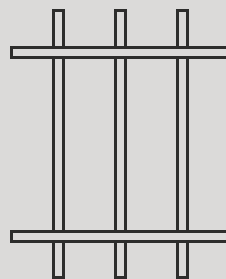

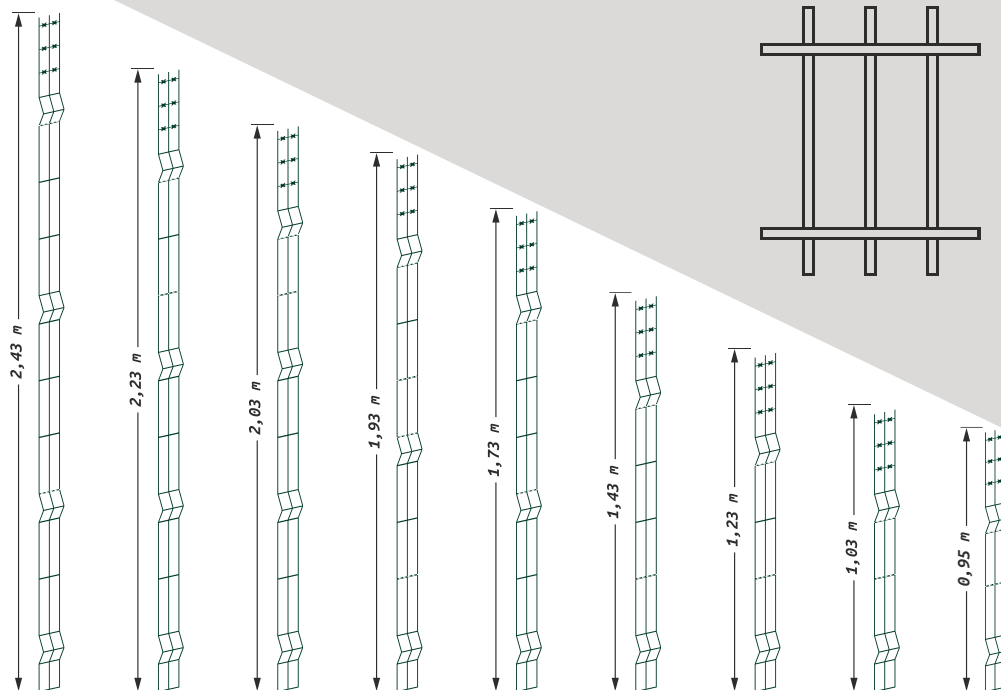

**Razor Panel** is an ideal fence system that offers aesthetic appearance and safety together. The welded panel and razor are produced in one piece. Compare to standard welded panel it is more deterrent and serve for medium security applications thanks to the razors on top. As a result of "all in one" system, razor panel save time & cost on transportation and installation. The fence system provides long lifetime due to powder coating on galvanized surface. Strongly recommended to use Razor Panel with EASYfix K-DAG Steel Post as a perfect safety solution.

# KAHLBERG® ALUMINUM POST

Kahlberg post (**90x115 mm**) is the world's only fence post specially designed for double (twin) panels. The panels are being hanged on the hooks at the rear. This system allows no penetration from the front. The hooks move inside the vertical channel up & down which gives a great benefit for installation in sloppy areas.

# ENVIROMENTAL PRODUCTION

## Protection of Natural Resources

As far as our technological, economic, and commercial possibilities allow us, our primer responsibility is to protect our natural resources by applying technologies that cause the least harm to the environment. Further, we aim to keep the use of raw materials at an appropriate level to ensure that a minimum amount of waste is created, and our environment is protected by appropriate recycling.

We love

The Nature...

# SINGLE LEAF GATE

Commonly used at residential & commercial buildings and gardens. Available in any colour, infill and dimension. Long lifetime with NANO coating.

*Custom  
Designed*

*Flexible  
Production*

*Durability*

*Easy  
Installation*

## ADVANTAGES

- Easy & Fast installation.
- Tailor made.
- High corrosion resistance due to NANO coating.
- Flexible gate opening direction due to special hinges.

## TECHNICAL FEATURES

- Gate frame: As a standard practice 40x40mm square profile is used for gate frames. Depending on the gate dimension, the frame section can vary...
- Gate Infill: Optional
- Gate Post: Standard 60x60mm Square Post with plastic cap. Gate post may vary for different dimensions.
- Gate fittings: Embedded Lock into frame, adjustable hinges, galvanised / stainless steel gate handles.
- Opening direction: Available in all directions.
- Colour: Standard colours Ral 6005 / green and Ral 7016 Anthracite. At request available in any RAL colours.

\* All technical features and material details may vary on project basis.

## SAFETY FIRST

KÖSEDAG accepts human as most valuable asset in all activities and adopts minimizing all kinds of losses that may occur as a primary business goal by creating a safer and healthier working environment.

KÖSEDAG considers the improvement of the health and safety levels of employees as a requirement of work efficiency. By applying the Occupational Health and Safety Management System, the system is periodically reviewed, and its performance is monitored, ensuring its continuous improvement.

**SAFETY  
FIRST**

# WELDED MESH

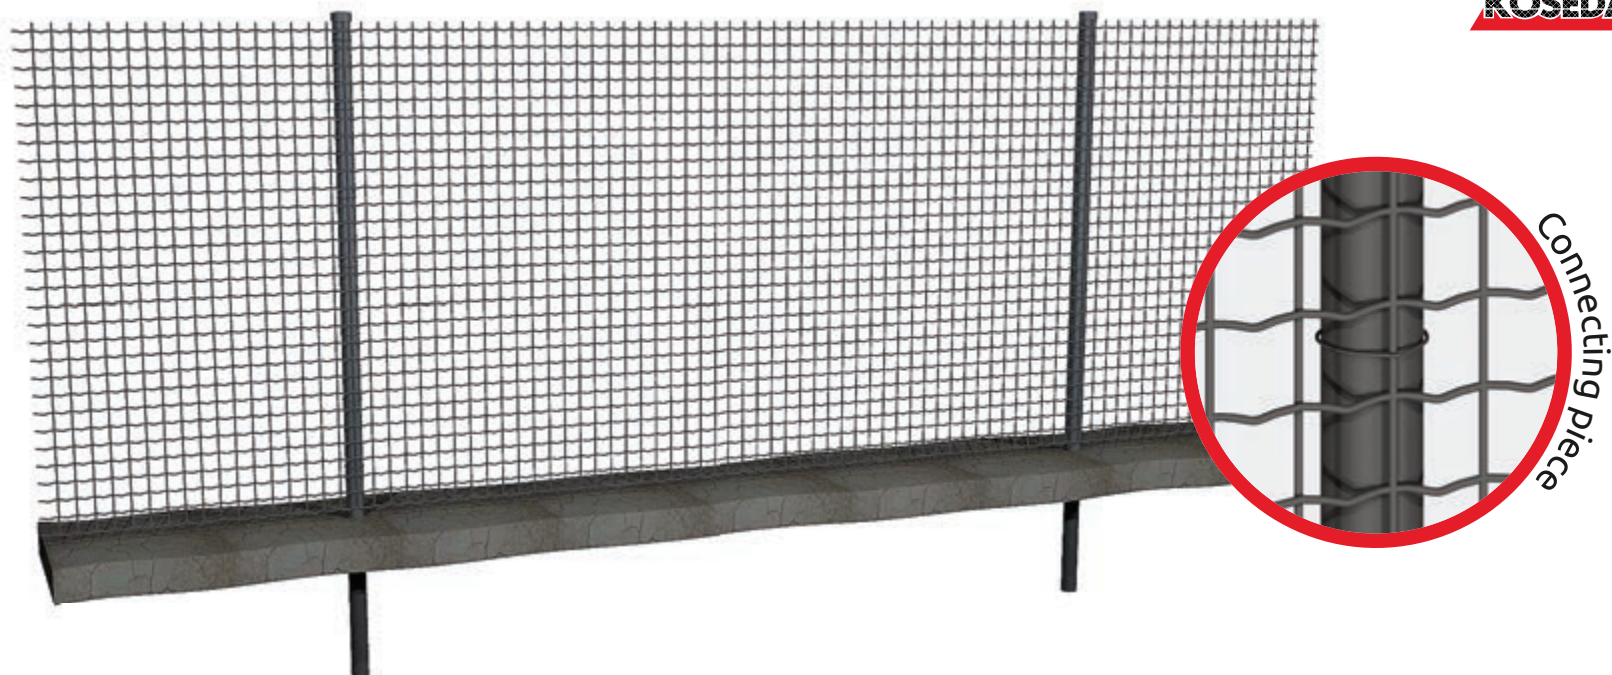

**W**elded wires, which are used with two different coating types (galvanized and PVC) are aesthetic, durable and an economical fence solution. As a similar material, when the welded wire is cut and deformed, only the damaged part is replaced in the welded wire. It has a wide range of usage areas with different sizes of mesh sizes.

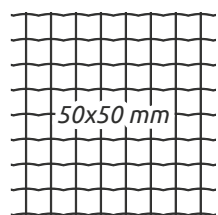

Product Name	Mesh Size	Roll Length	Wire Thickness	Coating	Height

**To produce solutions of the future world from today.  
Kösedag...**

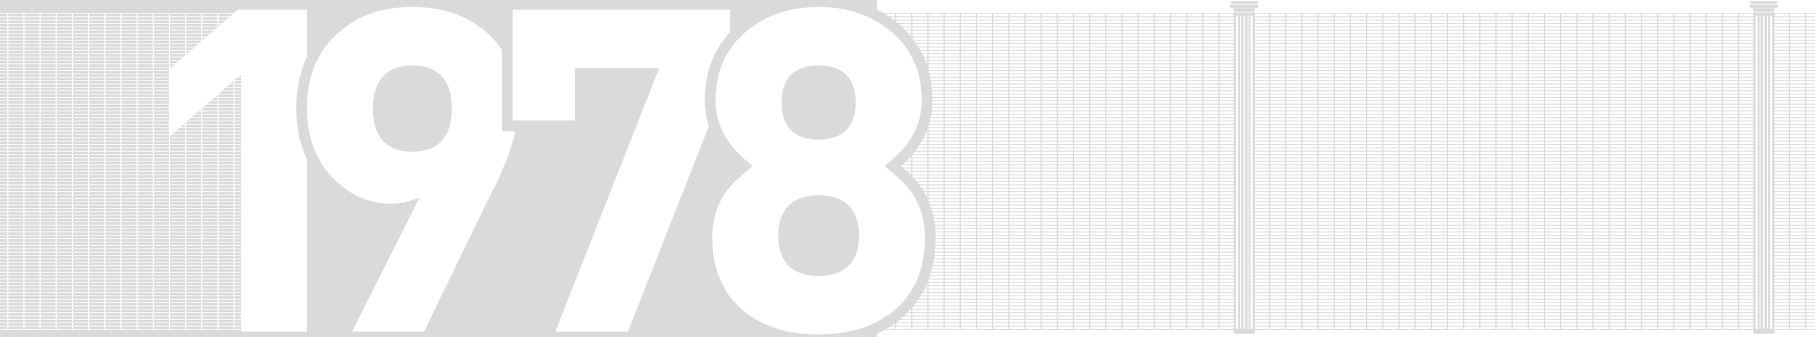

Kösedag, started production activities with the title of mesh, wire and fence in Turkey in 1978. Since its foundation, it enjoys the rightful pride of being the founder and pioneer of this sector in Turkey.

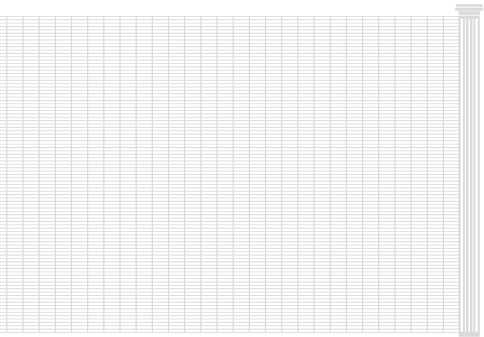

Kösedag has always maintained a sustainable growth and has created a dynamic working model, innovative solutions, a wide range of products and pioneering technologies integrated into its production track and sets trends.

since

**1978**

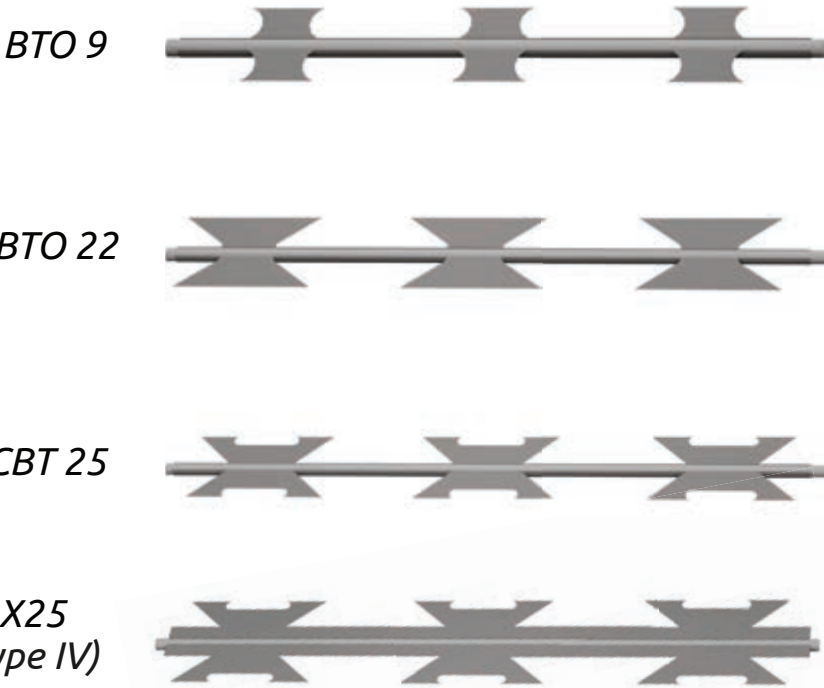

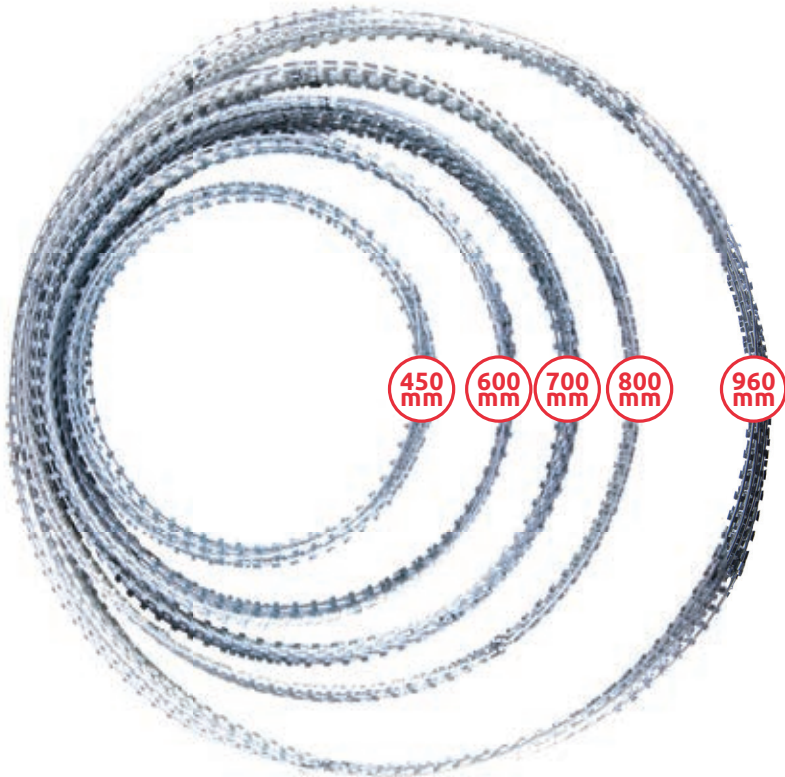

**KÖSEDAĞ®**

# RAZOR WIRES

Straight razor wires are usually applied to the top of the L/V extensions or fence in several rows or the entire fence.

# CONCERTINA RAZOR WIRE

Concertina razor wires are often used in areas requiring high security such as military zones, industrial facilities, borders, power transmission lines. As used on the V console, the security level is maximized by placing it on the top, bottom and/or middle of the fence system. It can also be used to create an additional firewall, especially by placing it on top of each other in the form of a pyramid at the borders.

Inner Wire	2.50 ±0.10 mm high carbon galvanized steel wire or stainless wire (AISI316L – 304-430)				
Sheet	0.50 ± 0.10 mm galvanized or stainless steel (AISI 316L - 304 - 430)				
Diameter(mm)	450mm	600mm	700mm	800mm	960mm
Coil Numbers	56				
Opening	~ 10m - 13m				
Number of Clips	84			140	

# FLAT RAZOR WIRE

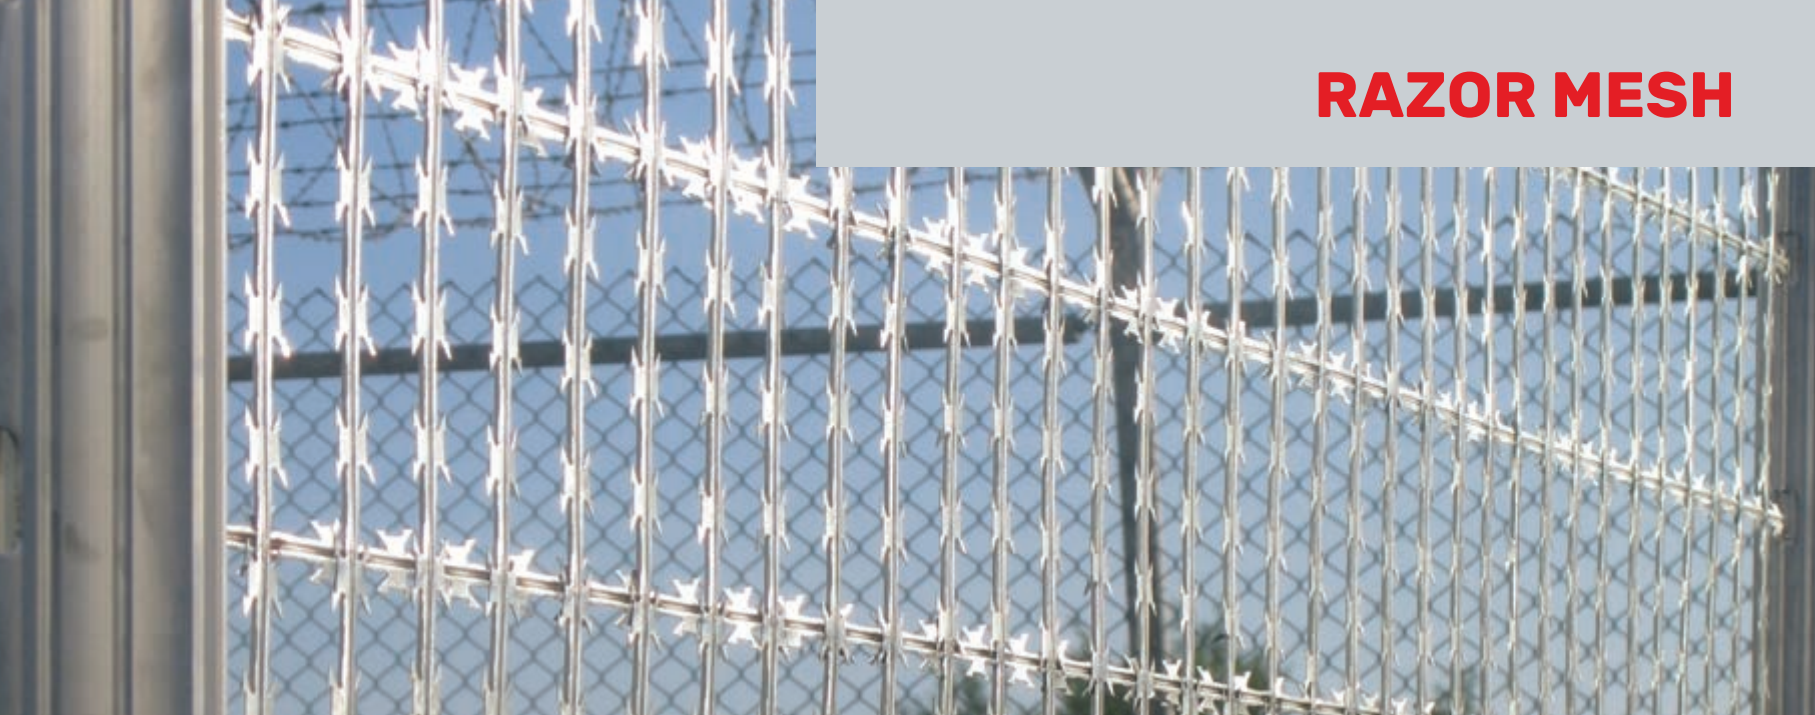

**F**lat razor wires consist of flat interlocking loops. It is generally preferred as an additional element that prevents climbing at the top of the fence system.

<b>Diameter(mm)</b>	450mm	700mm	900mm
<b>Inner Wire</b>	2.50 ± 0.10 mm high carbon galvanized steel wire		
<b>Sheet</b>	0.50 ± 0.10 mm galvanized or stainless steel (AISI316L - 304 - 430)		
<b>Roll Length</b>	6m. (at 5.5m during the installation)		

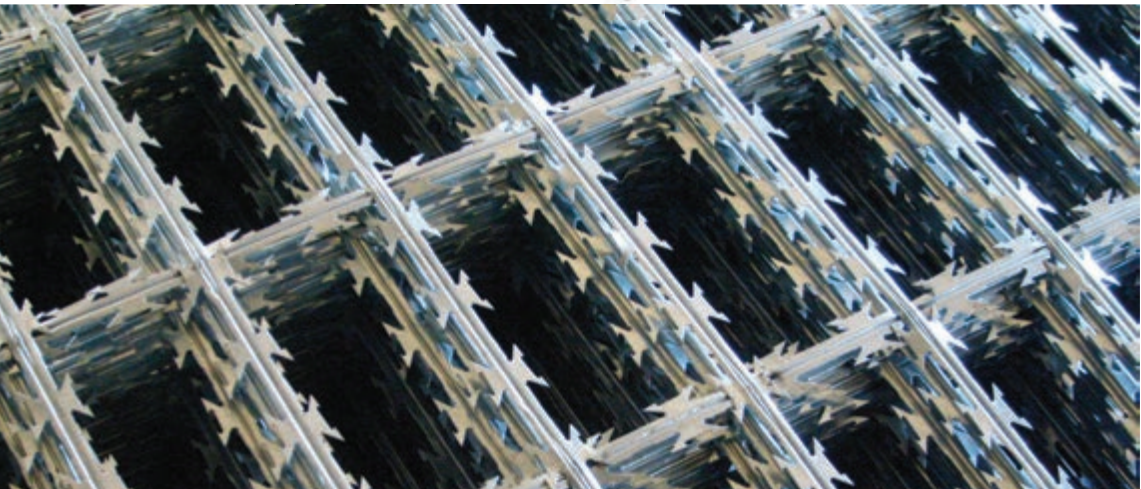

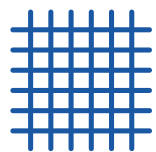

# RAZOR MESH

**W**elded razor wires are produced by joining vertical and horizontal razor wires to each other at certain eye intervals by welding method. In this way, a completely razor fence surface is created.

<b>Mesh Size</b>	50x150 mm	75x150mm	100x150mm
<b>Inner Wire</b>	2.50 ±0.10 mm high carbon galvanized steel wire		
<b>Sheet</b>	0.50 ± 0.10 mm galvanized		
<b>Blade Type</b>			

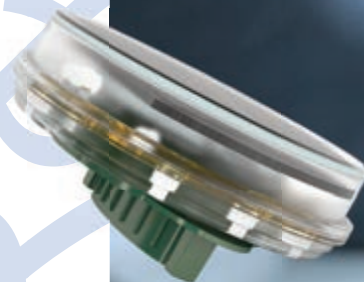

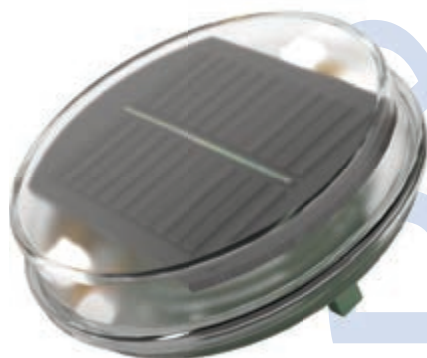

# R&D CENTER

## We Are Much More Than A Fencing Company

With the discipline of protecting all living spaces in our R&D studies, we lead the sector by producing special technology for different needs and demands of our customers.

Developing solutions that meet technological developments and new security demands at the highest level in our R&D centre and contribute to national economies and public safety are among our most important responsibilities.

We are Turkey's  
**643**rd and  
the first R&D  
centre of the  
fencing industry.

# MOBILE (Temporary) FENCE

**NEW  
PRODUCT**

# SETKO-SECURITY BARRIER

As KOSEDAG INC. Construction Safety Barrier - Setko, at points where there is a danger of falling, in order to ensure work and worker safety; By minimizing the risk of danger in construction, construction sites, structures, excavation areas, bridges, places where temporary guardrails need to be installed, factories, warehouses, warehouses, it ensures that the personnel in charge can fully concentrate on the work they need to do without worrying about safety. We increase the security level to the maximum by preventing workers from falling.

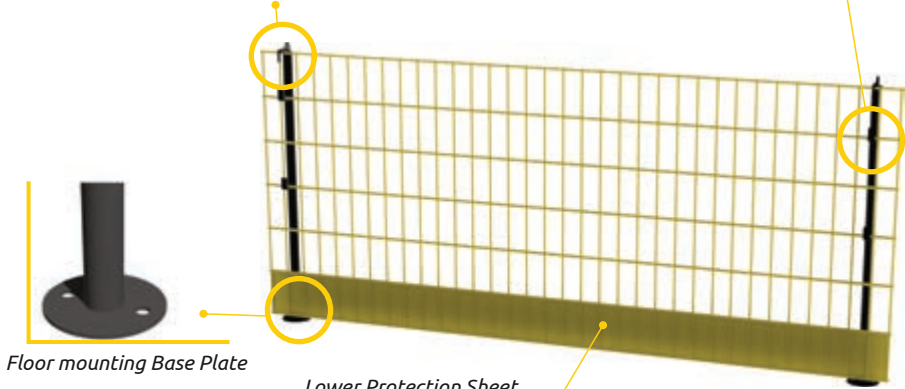

Mesh Sizes	76 x 182 mm
Wire Thickness	Ø 4x6x4 mm
Post	Ø 38 mm Pipe Post
Frame Dimensions	2.60 / 130 x 110 cm
Standards	TS EN 13374 + A1

Rotary spring lock mechanism

Holder, Stepper.

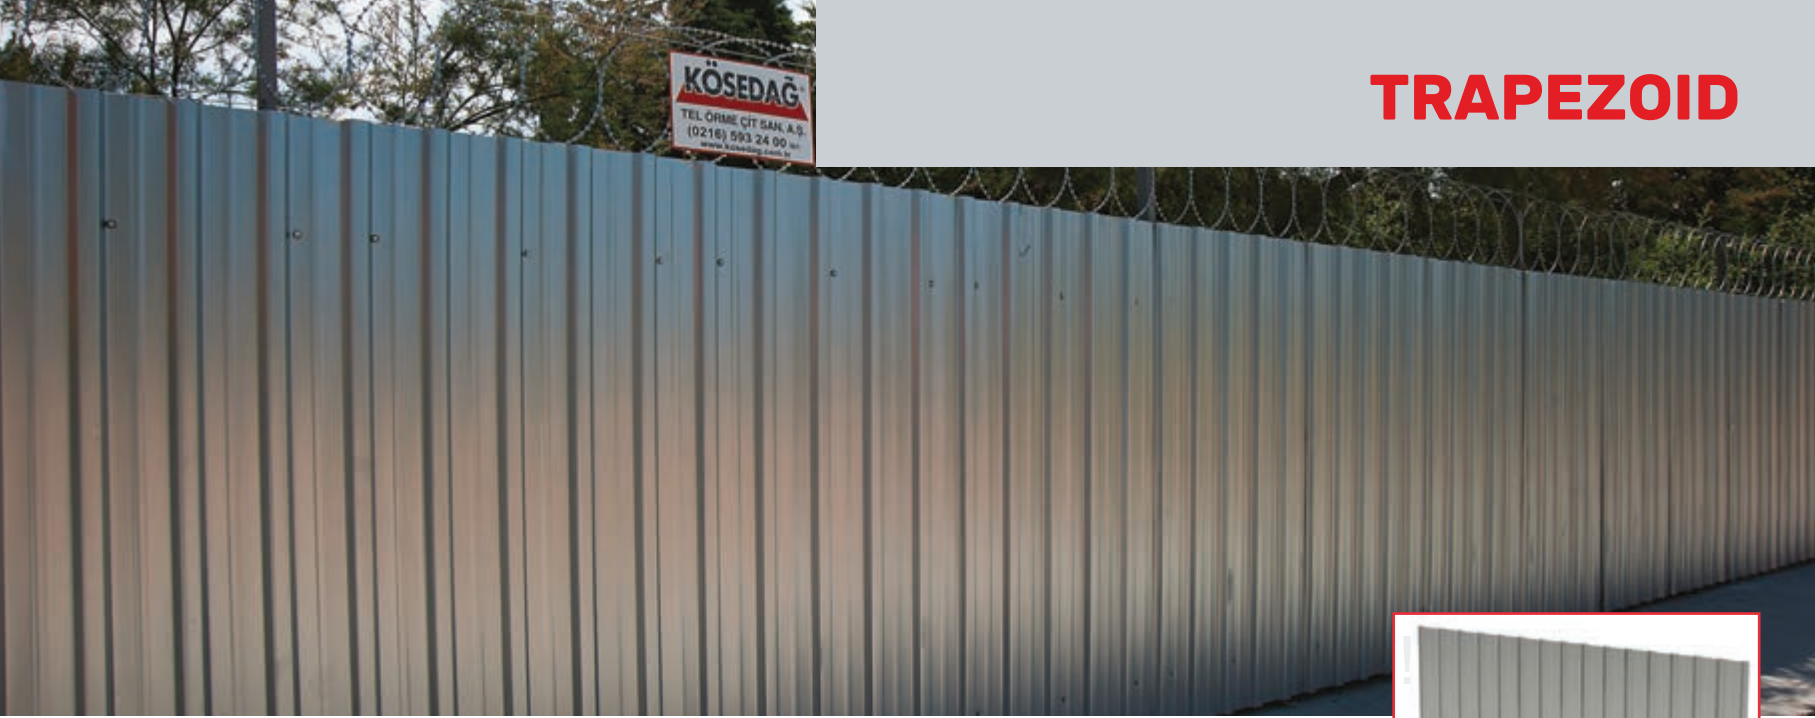

Floor mounting Base Plate

Lower Protection Sheet

# TRAPEZOID

# NOISE BARRIER

Kosedag Noise Barrier has a high performance and is easy to install and elegant outlook due to SECURIFIX K-DAG® STEEL POST system.

Special  
Design

High  
Security

Production  
Flexibility

Durability

Easy  
Installation

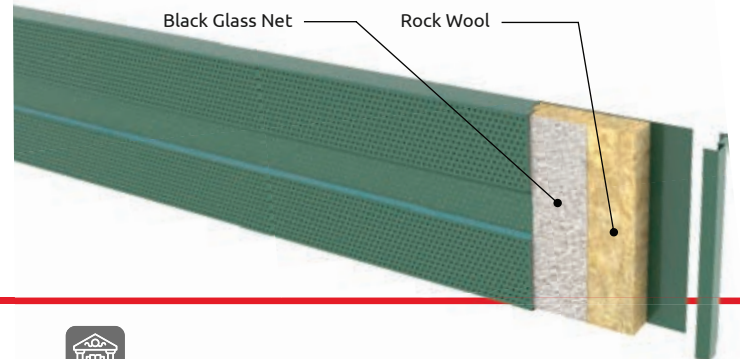

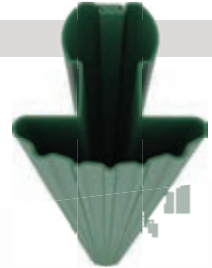

## Technical Specifications

### NOISE BARRIER

- **Module Size:** H:600 mm / W:1800-2400 mm / D:80 mm
- **Interior Material:** Rock Wool + Black Glass Net
- **Density:** 70 kg/m<sup>3</sup>
- **Coating:** Galvanized with NANO + Electrostatic Polyester Coated
- **Standards:** EN 1793-3, EN 1793-1, EN 1793-2, EN 1794-2

### SECURI FIX K-DAG® STEEL POST

- **Coating:** Galvanized + NANO Coating + Electrostatic Polyester

# AUTOMATIC BARRIER

## **Automatic Barrier Systems**

Automatic barrier systems are used in places that require intense security. They are mostly used in streets and avenues where municipalities implement pedestrianization projects. The barriers are used in shopping malls, facility entrances, building entrance doors, etc. They are systems used to ensure security in places. There are three types of barriers, hydraulic, pneumatic and manual barriers.

# ROAD BLOCKER

IWA14-1 / CTS Test-No:18482

## ROAD BLOCKER

Road Blocker is used in places that require high security such as prisons, consulates, refineries, shopping malls, special facilities, military, police force, plaza buildings to control the entrance and to provide controlled entry and exit. The main purpose here is to deter and prevent terrorist attacks and bomb-loaded vehicles. Road Blocker systems: produced in such a way that they can work in integration with the license plate recognition system, HGS-OGS system and card access systems.

# ELECTRONIC ENVIRONMENTAL SECURITY SYSTEMS

**E**lectronic perimeter security systems are activated in cases where physical measures are insufficient to ensure the security of high-risk areas. In addition to monitoring the area with cameras, intruders can be detected with mounted sensors. It works on the basis that various systems such as over-wire detection systems, volumetric detection or underground detection warn the security teams with special software. ipsum
