All technical features and material details may vary on project basis. Available in different panel sizes, mesh sizes and wire thickness. 5% tolerance on overall dimensions.

NANO COATING

NANO coating is a special technology that increases the adhesion performance of the coating to the metal surface and creates pores in NANO sizes. Thanks to these pores, the powder coating adheres with high performance on metal surface.

Wire thickness

A	4,00mm	6,00mm	8,00mm
B	4,00mm	6,00mm	8,00mm

Advisable Post and Fixation Systems

SECURI fix K-DAG® STEEL POST

SECURI fix K-DAG steel post (123x120 mm) is specially designed for high level security applications. The panels are fixed to post from rear side which prevent any break through from front side. Because of this feature its named SecuriFix K-DAG . 2 way of fixation; with cover plate or metal clips.

SECURI fix K-DAG® ALUMINUM POST

SECURI fix K-DAG aluminum post (123x120 mm) is specially designed for high level security applications. The aluminium type is especially recommended for high corrosive applications. The panels are fixed to post from rear side which prevent any break through from front side. Because of this feature its named SecuriFix K-DAG . 2 way of fixation; with cover plate or metal clips.

PROFILE POST

Profile post is used as a standard all over the world in different sections. The most common sizes are 40x60mm, 50x50mm, 60x60mm. The panels are fixed on the front side of the posts by metal clips and bolts
